

ZiP-mLFA Array Tests

ZiP Diagnostics offers a customisation and manufacturing service for “multianalyte Lateral Flow Assay (mLFA)” array tests. Key features:

- Custom test development
- Custom antigen/antibody design and production
- Multiplex for different diseases
- Integrates with a portable test reader
- Results in less than 10 seconds
- Storage and testing at room temperature

Customise Your Array

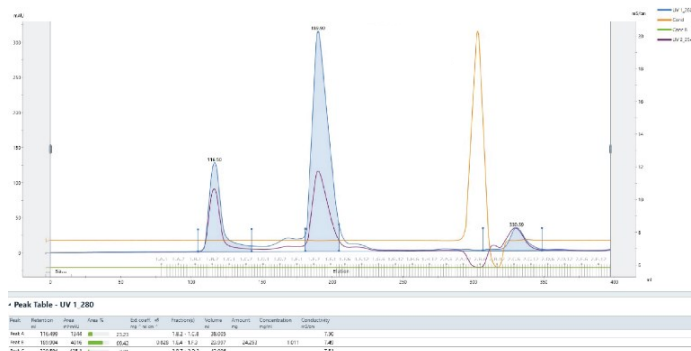

- Single or multiplexing
- Antigen and/or antibody
- Array size and number of analytes
- Qualitative or quantitative
- Detection chemistry

Related Services and Products

Protein Production Service

- Custom antigen design
- ISO-13485 production of antigens for use with ZiP-mLFA arrays
- High yield of quality functional and stable recombinant proteins

AX-2X-S Portable Test Reader

ZiP-mLFA tests are performed using the AX-2X-S reader.

Key features:

- Deployable at point-of-care settings
- Decentralised diagnoses
- Screen-guided easy-to-use workflow with automated results and reporting
- Integrated data environment
