

## Emergency Animal Diseases

Zip Diagnostics is currently developing tests for: foot-and-mouth, lumpy skin, African swine fever, avian influenza and Hendra.

Key features:

- Molecular point-of-care
- Nasal and oral sampling, with options for other sample types
- Results within 15-30 minutes
- Sensitivity comparable to PCR
- Storage and testing at room temperature

## Use with the ZIP-P2 Instrument

- Deployable at farm settings, sale yards, abattoirs, and customs inspection
- Integrated sample preparation
- Screen-guided easy-to-use workflow with automated results and reporting
